*Northeast CRMA data YTD 9/4/22.

BREWING PROCESS

Smuttynose is known for our widely popular kettle sours, using a preferred high-quality strain of Lactobacillus during the 2-day souring process, producing a signature tartness that is perfectly balanced by sweet fruit flavors and a malty backbone.

Over a **thousand pounds** of fresh blueberry puree is used to produce each batch of **Blueberry Lemon Bar Sour**, giving it a robust berry flavor with just enough lemon character for a zesty sour treat.

FOOD PAIRINGS

Blueberry Lemon Bar Sour pairs well with fatty proteins and cheeses, subduing the tartness on the palate and complementing the flavors of the dish overall. We suggest pairing with:

- Savory braised pork
- Glazed duck
- Soft cheeses
- Berry salads
